

West Anchorage Snow Disposal Project

Project Management and Engineering No. 19-01

Project Fact Sheet

Overview

The Municipality of Anchorage currently leases the existing Northwood Snow Disposal Site from the State of Alaska. A municipally owned site is needed to meet long-term snow disposal needs for the West Anchorage service area. Permitting has been approved, and the design work is substantially complete.

Please visit the [project website](#) to view the Site Selection Study, Design Study Report, and other supporting documents and to find additional information about the purpose and need.

Selected Location: Connor’s Bog

Connor’s Bog ([Figure 1: Site Selection Map on page 2](#)) is the selected location for the future West Anchorage Snow Disposal Site. A thorough evaluation of the site, provided in the Final Site Selection Study, determined that it best meets the project’s purpose and need.

The Final Site Selection Study was completed in February 2021 and is available at the [project website](#). The study summarizes the process for identifying a new snow disposal site, information gathered, public feedback, site options, site screening criteria, and reasoning behind the site selection.

Schedule & Next Steps

The project’s permitting and preliminary design phases are complete. Construction phasing and timeframe are dependent on funding and are slated for 2025 through 2026, pending funding availability.

PROJECT SCHEDULE	2019	2020	2021	2022	2023	2024	2025	2026
Data Collection								
Site Selection								
Permitting								
Design								
Bid & Award								
Construction								
Public Involvement								

Indicates Public Open House
